The Courier-Journal Building, corner Fourth and Main streets, is burning, despite the efforts of firemen for more than an hour to control the blaze. Starting in a jew-eiry shop, the fire soon spread to all parts of the upper stories and firemen said that there appeared little possibility to keep the loss under \$100.000.

The building has been famous for a half-century as the former home of the Courier-Journal and Louisville Times.

A number of other buildings are endangered by flying paper, the burning building now being occupied by the Courier-Journal Job Printing Company. WASHINGTON, Jan. 9.—Before the end of the week the Senate of the United States undoubtedly will vote to sustain Senator Newberry to all the rights and privileges of his seat in this body, despite the charges made against him and his managers by Henry Ford and those associated with him. Senator Newberry spoke today in his own defense and made gains among those who were inclined to reserve judgment in his case.

ties previously used for purposes prohibited by the prohibition law. Turning to the constructive side and considering one of the things most frequently mentioned as an argument for prohibition, the "increase" in bank deposits, one finds an absence of fact to warrant the assertion that these prove the benefit of prohibition. Take the case of the postal savings banks. Following is an extract from a dispatch from the New York Herald's Washington correspondent:

DECLINE IN SAVINGS. "A continuous decline in the business of postal savings banks, coincide, according to official reports of the Postomes Department with the beginning of war time prohibition on July 1, 1919. Officials of the department refuse to discuss the decline from the standpoint of prohibition, but point out that all postal business fell off during the depression."

Increases of from 80 to 100 per cent occurred in wheat and cottonseed oil, both largely seasonal increases and in sinc, cament, face brick and petroleum. Outside of the seasonal decrease in meata, all the declines from 1919 were very small.

The general level of prices in November showed little change, but a slight declining tendency was manifest. This was especially true of the prices of farm products which in most instances declined below their already abnormally low level. Wholesale food and clothing prices and retail food also tended towards a lower level. The most important advances were in silk and petroleum. Iron, steel and coal remained practically unchanged while other metals, except lead, advanced.

MISSION IS HAY TEN

The cotton erop turned out to considerably larger than earlier estimates, but \$6 per cent less than the prewar average. Imports of raw cotton during November were the heaviest since March, 1920, but exports slumped over 25 per cent from the high mark made in October. There was a slight increase in the number of active spindles and an increase of about 61 per cent in the consumption of cotton, to the highest monthly figure since June, 1920.

Woolen mills were generally less states.

Typesetting Machine Has Only Six Keys.

LOUISVILLE (Ky.) Jan. 9.uisville has a print shop such as is found nowhere else in United States. Its books for elementary grades weigh fifteen pounds; its typesetting machines have only six keys as compared with the 90-odd combinations possible in the average typesetting machine, and a hammer and nail punch are the tools of the proof-reader. Miss Susan B. Merwin, superintendent, says all this is true, and she probably knows.

All commedities in the building material, clothing, tobacco and foodstuff groups were being produced in greater volume than the 1913 average except pork products, which were only I per cent below. The metals were all considerably below the prewar basis in spite of good increases during November while the fuels were divided with petroleum and by-products coke far above the prewar averags, the coals slightly below and beenive coke far below. Copper and been than 26 per cent of their prewar rate.

Stocks of commedities at the end of November were in general, slightly larger than in 1919. The largest relative stocks were those of corn and coal, both more than five times as large, due partly to seasonal variation.

The publishing house with these queer davices is the American Printing House for the Blind, and because of its publications thouseands of bind persons read what otherwise would not be available to them.

GETS GOVERNMENT AID.

The Federal government pays the house \$50,000 annually and for this amount books are provided for fifty-six schools for the blind country. As an indication of the volume of work and 12,539 bound volumes were produced, and in addition, 4211 pamphlets and 1044 copies of muscical selections were printed.

The typesetting machines have only six keys because the alphabet for the blind comprises six points on from one to six dots, in different combinations.

from the high mark made in October. There was a slight increase in the number of active spindles and an increase of about 61 per cent in the consumption of cotton, to the highest monthly figure since June, 1920.

Woolen milis were generally less active in November than in October, this decline in most cases amounting to about 5 per cent. A considerable increase occurred in the market price of woo', though the producer receided elightly less for his wool on December 1 than a month before. Imports of raw silk increased slightly during November and consumption declined, while stocks were larger. The price of silk showed an increase of over 18 per cent during the menth. Late reports received by the Department of Commerce indicate that the textile business during December has slackened since November. This is only partly due to "between season" duliness. "Hope is held out by some underwriters that a relief from the gradually decreasing premium income will come some time early in the year 1922. They base their expression of hope on the fact that the big decreases in 1921 came after the middle of the year and that the decrease has been progressive during the last six months of 1921. The first half of 1922 may see further reductions in premium income, it is predicted, with a gradual climb curing the last six months of 1921.

Some Interesting Facts That Investors Should Remember

A few months ago Municipal Bonds sold to yield 5½ and 6%. Today they yield from 4¼ to 4¾%. Canadians, sold at 7½% today yield from 5.80 to 6.25%. Public utilities from 71/2 to 8% are now from 6 to 6.25%.

This marked advance in price has not yet been felt in even the very best class of industrial bonds and among sound industrials investors are still able to purchase long term first mortgage bonds to net better than 7%.

NEW YORK STOCK EXCHANGE NEW YORK CURB BONDS

[BY A. P. NIGHT WIRE.]

NEW YORK, Jan. 9.—Selling of the general list with few minor exceptions made further progress in the stock market today. Extreme reactions of 1 to 2 points were effected on comparatively small offerings.

Little attention was given to the continued ease of money on call and time, the strength of the foreign exchanges, and the more encowraging tone of advices from leading agricultural centers.

Demand loans opened at 4 per cent, falling to 3½ at mid-day and to 2 per cent in the final hour. The minimum figure is the lowest rate reported on the stock exchanges since November, 1919. Offerings of time funds at 4½ per cent applied to all periods, with freer purchases of commercial paper.

Another cut in Pennsylvania oil prices and bearish developments pertaining to industrial, mercantile transportation conditions precipitated the reaction in which professional shorts again rendered assistance.

Oils supplied fully 25 per cent of the day's business. Pronounced

Principal and Interest Guaranteed by Southern Pacific Company

As security for these bonds the Southern Pacific Company has deposited with the trustee, collateral consisting of securities valued in excess of \$83,000,000.

The bonds are a direct obligation of the Central Pacific Railway Co., the entire capital stock of which is owned by the guarantors, and whose properties are leased for a period of ninetynine years dating from 1394.

These bonds offer an excellent possibility for appreciation as to both principal and income yield, and are selling at a very attractive price when compared with other issues of equal merit.

We are completing an organization for the manufacture of a staple necessity in Los Angeles, the market for which is established. Upwards of \$50,000 have been expended to date for investigation purposes and the above amount is necessary to complete. No further investigation necessary. We are willing to make concessions to a party who is in position to finance as to that amount. According to figures available the investment will be returned in 3 years at the outside with 8% and a substantial interest retained. There is an opportunity for the party furnishing the capital to become active if he so desires.

Every Broker Should

Know This

Los Angeles, Cal.

To provide protection against the numerous hazards peculiar to the brokerage business, a special insurance policy has been devised. It is known as the "Brokers' Blanket Bond." With the exception of losses incurred in transit by mail or express, this policy covers practically every form that an investment house can sustain.

house can sustain.

Losses of funds or property due to dishonesty of employees, accidental misplacement of property or papers, burglary
and similar causes will be compensated
for under this policy.

We are prepared to handle this intricate
form of insurance expertly and carefully.

The particulars are interesting. Send for them.

Will Heave as Good as Ever.

CHICAGO, Jan. 5.—Urban "Red"
Faber, ace of the White Sox staff, is going to be as good as ever—
in a pitching way. Following an operation on his right knee two menths ago, there came hints that the big fellow never again would be the same, but he has just returned from Cascade, Iowa, his home town, and he insists the aliing leg is responding so well that there need be no wyerry about his being as affective as in 1921, when he registered twenty-six victories.

The big fellow came back to town especially to take treatments that are expected to hurry along his complete recevery. The doctar who performed the operation is giving the joint electrical baths with the idea of restoring a little more life to the affected parts. Several weeks of this are counted upon to put "Red" back on both feet and permit him to navigate without the aid of a cane.

The Parana marks the return by certain European shipbuilders to an era of coal-burning ships They have become convinced, according to capt. Hesiterberg, that it is now cheaper, under present fuel raige in Europe and other parts of the world, to operate vessels with coal than with fuel oil.

Atter discharging cargo at Seattle and Vancouver the Parana will head for the Orient of another leg of her 'round-the-world forulse.

ADALYNNE WRECKER OF THREE MEN, KEYES SAYS.

Love Hath No Fury Like a Woman Scorned" Quoted as Showing Kennedy Slaying Motive.

"Oh, what a wreck Madalynne Obenchain has made! She has made a fool out of the man she swore she would love, cherish and honor. She has made a corpae of Belton Kennedy, the man she swore she loved. She has made a murderer of Arthur Burch and a murderess out of heraelf. Hasn't she made a wreck of her own life and the lives of everyone she knew?"

In these words Dep. Dist.-Atty. Keyes in the opening argument to the jury in the murder trial of Arthur C. Burch yesterday summed up the prosecution's theory of the slaying of

terday summed up the prosecution's theory of the slaying of J. Belton Kennedy in Beverly Glen last August 5.

When court adjourned after Mr. Keyes had spoken for an hour, the Deputy District Attorney had skilling and dramatically painted the background of the picture the Btate is presenting to the jury of the murder, the motive and the asserted proof. He had called upon the ten women and two men in the jury box to inflict the extreme pensity—to order Burch hanged—if they are convinced of his guilt.

"To understand this case we must take into account the lives, advended in the state into account the lives, advended in the lives, advended in the lives, advende

From the many latters introduced into evidence the Deputy District Attorney read paragraphs here and there, tracing this change of feeling as shown in the writings of Madalynne Obenchain to the man she wanted to wed.

"At first there was no breath of love in the letters." he said. "There was nothing but impersonal friendship apparently between her and Kennedy. As you read these letters come in one after another, you find that soon there commences to be in the letters a spirit of love, and you will find that run-

of love, and you will find that running through nearly all the letters written by her to him up until shortly before this tragedy.

"I believe Mrs. Obenchain really, truly and sincerely loved Kenndey in a way. I believe she loved him as much as she could ever love any man. And of the three involved in this matter, I believe J. Belton Kennedy was the man of her choice up to a certain time, July of 1911."

this matter, I believe J. Belion Kennedy was the man of her choice up to a certain time, July of 1921."

Proof of the motive for the murder is contained in Madalynne's notes to M. Louise Wilson, her confident, Mr. Keyes stated, He quoted such passages as "unless he (Mr. Kennedy) is sufficiently strong to be in S. F. by June 29, I will go to Honolulu and he can go to the dickens," and "if B. doesn't come here I will never marry him —as true as God is in heaven this lis his last chance—and when this little old firsh girl is through, she may be broken and scarred forever, but I'll be through so help me God!"

The last letter written by Mrs. Obenchain to Mr. Kennedy included the following:

"You have accomplished too wall your motive in my life. I wonder if you are happier for it. Never until this day could I see how deliberately you were torturing mebut it all comes back so clearly now. What a fool I was—what a bilind, silly, stupid fool—there is nothing you could ever do to restore my faith or love. It is gone!

Will my lost, disillusioned soul ever haunt you? Can you find peace ever—even in eternity?"

Hurch was suddenly brought back into the picture when Mr. Keyes said, "Now let us see about Arthur C. Burch and Madalynne Obenchain. I think we have the testimony of some witnesses that they were together several years ago in school. We find that Burch visited Mrs. Obenchain's apartment as if he owned it. "We have seen him taking groceries there, visiting her often. And we know it was about this time that he separated from his wife."

Bianca Saroya may well be rated as the most thoroughly enjoyable singer of the group of principals. Certainly her rendition of the Aida part had a languishing sweetness musically. of style that entitled her to a real triumph.

Nina Frascani as Amneris was another singer of distinction. Her voice is one of depth and richness. Its quality improved markedly when she began her first important scene. Ferhaps she saved herself for this, as is sometimes the fashion of principals. At any rate she and Miss Saroya received a fine tribute of appreciation from their hearers for the beauty of their duet. Miss Frascani insisted on the dramatic values in her role, and gave her words an especial significance, which is rare for an Italian singer appearing before an American audience. Her presence was satisfying.

LOS ANGELES, Jan. I.—(To the Editor of The Times:) Once upon a time the recognized law-making authority of Russia—a car—made it the law of the land that no man should wear whiskers. This is not a joke, but history.

The crar meant it. It was the law. Violation, if widespread, would bring the law into contempt. It was the duty of all good citizens to support, obey and assist in the enforcement of the law. If a man hankered for whiskers he had the privilliege of getting out of Russia. Perhaps it would have been well, if a man insisted on a hirsute chin, to revoke his citizenship temporarily.

Anybody who knows anothing

to revoke his citizenship temporarily.

Anybody who knews anything about laws, their scope and purposes, can see this easily.

It was wicked, wrong, indefensible, downright rotten for a Russian to grow a beard—to sprout facial hair secretly in his own home, stealthily concealing his injustry from the force of chin-whister-law enforcement agents.

But the perverse Russians did not see it that way. At the gates of Moscow Czar Poter posted soldiers who intercepted peasahts and sheared their jowls whenever they tried to enter the capital with law-less goateea and Van Dykes concealed on their persons. The peasants howled, fied to the steppes and promptly broke the law again. All Russia Joined in the howl. Such lawless and wicked people perhaps never were known. The situation was shocking.

Then Peter, who is not remembered as a fool, concluded that perhaps the law was wrong and not

are the casus belli.

Popular indignation in Glendale has taken the form of a letter from the Chamber of Commerce that informs the parade committee of the Pasadena event that Glendale cannot and will not accept a second prize for its float because it did not win this particular trophy and does not care to take that which is not its own.

The letter further says that it is the unanimous opinion of Glendale residents that because their city had won first prize on two occasions it was decided by some power behind the throne that it could not again be the victor. "If this is the case," continues the communication, "It is useless for a city that has won in the past to aspire to honors in the future."

PROTESTS OTHER AWARDS.

PROTESTS OTHER AWARDS. PROTESTS OTHER AWARDS.

The Chamber of Commerce contends that a cloth banner displayed on the float Portland, Or., which was given the first prize, disqualified it according to the rules of the contest, which, it is said, prohibited painted advertisements of any kind appearing on the floral entries. No intimation that it will refuse to enter future parades is given by Glendale, although the official letter has stated that city will feel justified in refusing to compete for prises in the future unless the committee on awards alters its opinion in this year's contest.

The players were Premiers Lloyd George of Great Britain, Bonomi of Italy and Lord Riddell on the one side and Premier Briand, Andrew Bonar Law and Sir Edward Griggs on the other.

It was the first appearance of both Premier Briand and Pre mier Bonomi on any course.

When the tenth hole had been reached the golfers remembered they had called a Supreme Council meeting for 5 o'clock and had to abandon the game.

Blue and White Indulge in First Real Turnout; Coach Nixon Gives Out the Dope.

(EXCLUSIVE DISPATCEL)

CLAREMONT, Jan. 9. - Coach Eugene White Nixon Pomona College track mentor, gathered a great throng of prospective B.V.D. athletes around him on Alumni Field here this afternoon and told them his hopes and fears for the 1922 track season. The occasion of the gathering was the first official curnout of the Blue and White cinderpath artists, and the Sagehen director was agreeably pleased to greet about seventy-five candidates for the honor of representing the Claremont institution in the meets scheduled for the next two months.

"Let me cite the record of George Capron, Minnesota, who played in 1997, the year that con-ference teams were allowed but five games. The Minnesota score of that game was: Minnesota 3) Ames 0 (two drop

Minnesota 8, Nebraska 8 (two drop kicks.)
Minnesota 12, Chicago 18 (three drop kicks for Capron.)
Minnesota 16. Wisconsin 16 (four drop kicks for Capron.)
Minnesota 10. Carlisle Indians 12 (one drop kick.)
All the Minnesota scores of that year with the exception of one touchdown against Carlisle were made from Capron's toe.

The records as given in the Pootball Guide are rather misleading, largely because of the confusion between the line of scrimmage and the point of kicking the ball in figuring the length of the kick. In two instances against Chicago, Capron kicked from the 85-yard line, the ball was on the 40-yard line or thereabouts, but I am under the impression that the record of Payne was figured from the point of kicking."

PLAN TO HELP COPPER MINES.

Discuss Cheaper Rates from Arizona to Harbor.

Refinery Proposition Again Before Commerce Board.

Pioneer Points to Japan Good Market for Ore.

sumption of copper mining of Ari-cons and the establishment of a large refinery near Los Angeles large refinery near Los Angeles Harber will be considered today when for the second time a committee made up of Chamber of Commerce industrial and 'traffic experts meets to consider demanding a freight rate of \$5 per ton for hauling copper ore from Arisona mines to the harbor.

The proposition was laid before the chamber committees yesterday by James & Douglas, pioneer mining man of Arisona. He declared that the copper industry is in the doldrums at present because it costs more to haul copper from Arisona to the Atlantic seaboard than it is actually valued at on the open

is actually valued at on the open market.

Copper is worth 13 cents per pound and it costs \$18.50 per ton to haul it to the Atlantic seaboard. The freight rate from Sait Lake City to San Francisco is \$6.50 per ton and Mr. Douglas thinks Los Angeles Harbor should have a rate of \$5.

At the conference yesterday he pointed out that Japan offers a fairly good market for copper if it can be shad at an attractive price. The plan outlined is that if copper could be shipped here and refined, a considerable quantity could be kept at the wharves at all times, and shippers might get an attractive ocean rate on it at times when tramp steamers or other vessels might need a few hundreds tons of ballast. The traffic committee of the chamber points out that copper might be used to advantage as ballast along with shipments of cotton to the Orient.

After today's conference the proposition will be submitted to the Chamber of Commerce directers. Mr. Douglas is seeking a \$4-a-ten rate on copper for export.

Globe First in **Total Lines of** Advertising During 1921

During the year 1921 the Globe printed a total of 11,870,888 lines of advertising, the greatest volume of any newspaper in Boston, and this in spite of the fact its advertising columns are so strictly edited that thousands of dollars' worth of advertising is rejected as unacceptable.

Do advertisers use more space in the Boston Globe than in any other Boston newspaper?

BECAUSE

Boston Globe advertising is productive advertising-because Boston Globe circulation is produc

It is a circulation that represents purchasing power—that reaches buyers as well as readers—a circulation that delivers 100% on every dollar spent for advertising.

Boston Globe First in Department Store Advertising

During the year 1921 the Globe printed 3,170,368 lines of department store advertisin leading the second Boston newspaper (having Daily and Sunday editions) by 441,577 lines.

LOCAL VIEWPOINT

The Globe carries more individual advertisements (display and classified) than all of the Boston papers (having Daily and Sunday editions) combined.

The viewpoint of the local advertisers—the department stores—is especially interesting. They judge newspapers by results. They are on the ground; they know newspaper values because they can check returns from day to day.

They Use More Space in the Globe Than in Any Other Boston Newspaper.
On Sunday, the Boston Globe Carries More Department Store Advertising Than

Boston Globe First in Real Estate Advertising

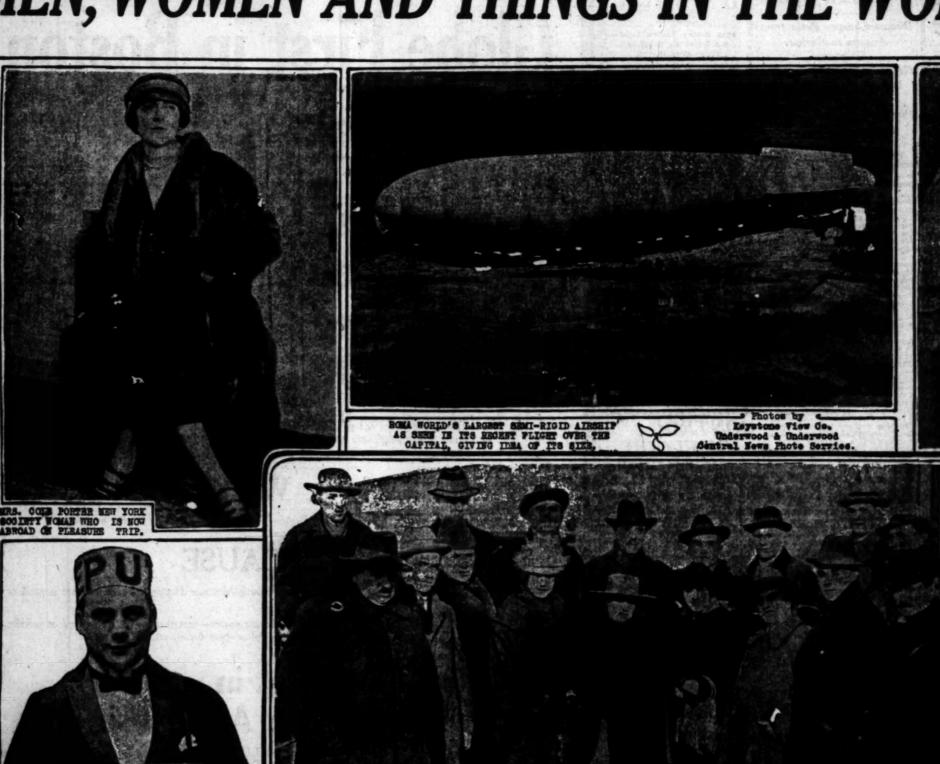

During the year 1921 the Globe printed 81,493 Real Estate advertisements. This was 67,166 more than were printed in the second Boston newspaper (having Daily and Sunday editions.)

For immediate response—for reader-attention—for result-producing circulation—the Boston Globe has no equal in the New England field—a fact that is substantiated by its remarkable postion in the great volume of advertising which it prints each year.

REMEMBER

The Globe circulation reaches not mere numbers, but readers—the kind of readers every advertiser wants to reach—readers vitally interested in every line of news and advertising printed in the paper which they read and on which they rely for their buying needs.
